

 Nordham is one of the few innovative manufacturers of HVAC/R and Software and Control Products.

The company develops and constructs Systems and precision solutions in domains of Heat-, Refrigeration- and Control- Technologies, as well as Industry Automation.

The main aim of Nordham is maximizing the Development of innovative Products and Sytems, in order to deliver our customers the greatest added value possible.

# NX2

## Pressure transmitter

### FEATURES

- Simple installation and direct installation
- Robust and durable design
- Compact and functional
- User friendly interface
- Long life use
- German design and technology

For more information  
[www.digitech-ltd.com/nx2](http://www.digitech-ltd.com/nx2)

Nordham Pressure Transmitter is the best solution for the measurement requirements required in the common industrial applications. With very high accuracy, the industry can easily work in different areas of use. Thanks to its durability, it fulfills its task easily and under heavy conditions for long periods of time. The NX2 series is Nordham's industrial heavy duty pressure sensors.

The Nordham Pressure Transmitter NX2 supports different output signals from different industries, can be included in any way with different international process and electrical connection capabilities. Ratiometric 0-5V, 0-10V, 4-20mA versions are available and offer different electrical / mechanical connection options.

Stainless steel has a sturdy, compact and durable body. It is resistant to high fluid pressures and is highly resistant to extreme industry conditions. Easy to install and long life.

### USAGE AREAS

Hydraulic and pneumatic systems, pump and compressor inputs and outputs, Compressor oil press, machine / factory automation, liquid level sensing, R & D studies, process industries, chemical industry
